30.4401 45-0701 - Geography and Environmental Studies. **Geography.**

Program Title

Geography Minor

Program Delivery

Method

On Campus

Online/Web-based

Is this program interdisciplinary?

No

Does this proposal impact any courses from another College/School?

No

What are the total 15
hours needed to
complete the
program?

On-line/Web-based Information

Reason for offering

Web-based Program

Geosciences is seeking to maximize the impact of its existing curriculum to reach more students interested in geography and geographic information science (GIScience). The department already has 24 credits of courses within these areas that are available online, but does not yet offer an online option for the geography minor. Having an online option for the minor will provide opportunities for working professionals, non-traditional students, and others who for whatever reason cannot easily be on campus. An online minor will also increase the overall reach of our geography curriculum and provide synergy with other degrees at the U of A that naturally incorporate geographic concepts.

Maximum Class Size 40

Description and justification of the request

| Description of specific change | Justification for this change |
|--|---|
| <p>We are requesting that the CIP code be updated from the longstanding "Geography" code to "Geography and Environmental Studies".</p> | <p>Effective 2020, the National Center for Education Statistics recently established a new CIP code for "Geography and Environmental Studies" which better captures the geography teaching, research and service strengths developed in recent decades at University of Arkansas. For example, the new CIP code recognizes "climate science, sustainability, environmental science and policy, research methods, geographic information systems (GIS), human geography, physical geography, remote sensing, and public policy" whereas the old code neglects key areas of technical, human, and physical geography that have broad implications worldwide. Geographic</p> |

| Description of specific change | Justification for this change |
|--------------------------------|--|
| | <p>information systems, are a key area of interest within geography and are a vital component between the educational/research/service collaboration between Department of Geosciences, Center for Advanced Spatial Technologies (CAST), and other campus organizations. The new code is recognized, as it should be, as a science, technology, engineering, and math (STEM) field by Department of Homeland Security whereas the old code is not. Based on information shared among department chairs through the American Association of Geographers (AAG), other respected geography programs are transitioning to this new CIP code as it better reflects the reality of the discipline.</p> |
