Is this program interdisciplinary?

Yes

College(s)/School(s)

College/School Name

Bumpers College of Agricultural, Food, and Life Sciences (AFLS)

Does this proposal impact any courses from another College/School?

Yes

College(s)/School(s)

College/School Name

Bumpers College of Agricultural, Food, and Life Sciences (AFLS)

What are the total hours needed to complete the program?

16-17

Program Requirements and Description

Requirements

SUSTAINABLE LANDSCAPE DESIGN and MANAGEMENT MINOR

The Department of Landscape Architecture offers, and oversees, two interdisciplinary minors related to plants for students interested in significant world issues in landscape design, climate change, management, and sustainability. These minors are available to any student pursuing a major within the Fay Jones School of Architecture + Design.

This *Sustainable Landscape Design and Management* minor combines coursework in the foundations of sustainability, sustainable landscape practices, horticulture, landscape management, operations, and installation.

Responsible landscape professionals increasingly incorporate sustainability into their design, maintenance, and management philosophies. This minor will allow students to incorporate principles of sustainable landscape design and management into the built world, from large-scale landscapes to site-specific spaces. Sustainable landscape management ensures that the landscape needs of today are met without compromising those of future generations by giving equal attention to social, natural, built, and managed systems. Issues addressed include:

Basic understanding of sustainability at the local to global scale

Sustainable landscape practices lessening maintenance time and costs

Ecological principles of site design and construction grading (ground plane manipulation)

Proper plant selection with preference to native and/or organically grown plants that require minimal supplemental nutrients and water, attracting wildlife and pollinators, and are healthier for human use

Appropriate pruning to minimize waste, reduce costs and maximize the plant's benefits
Sustainable planting design and maintenance to maintain local character and identity
Sustainable landscape practices that help to maintain local jobs and businesses
Identifying locally sourced materials to minimize transportation costs and resource consumption

Required Courses:

LARC 2714 Ecological Design and Construction: Terrain 4

Choose three hours from: 3

HORT 2003 Principles of Horticulture

or HORT 3503 Sustainable and Organic Horticulture

or SUST 1103 Foundations of Sustainability

Choose nine - ten hours from the following: 9-10

LARC 2113 Design Visualization, Inquiry and Communications

or LARC 3734 Sustainable Design and Construction: Material and Methods of Assembly

or HORT 3103 Woody Landscape Plants

or HORT 3203 Sustainable Landscape Practices

or HORT 3503 Sustainable and Organic Horticulture

or HORT 4033 Professional Landscape Installation and Construction

or SUST 1103 Foundations of Sustainability

A student must take a minimum of 6 hours in the 3000 and 4000 level courses to satisfy requirements for the minor.

Total Hours 16-17

Program Goals and Objectives

Program Goals and Objectives

Responsible landscape professionals increasingly incorporate sustainability into their design, maintenance, and management philosophies. This Minor will allow students to incorporate principles of sustainable landscape design and management into the built world, from large-scale landscapes to site-specific spaces. Sustainable landscape management ensures that the landscape needs of today are met without compromising those of future generations by giving equal attention to social, natural, built, and managed systems.

Learning Outcomes

Learning Outcomes

- Basic understanding of sustainability at the local to global scale
- Sustainable landscape practices lessening maintenance time and costs
- Ecological principles of site design and construction grading (ground plane manipulation)
- Proper plant selection with preference to native and/or organically grown plants that require minimal supplemental nutrients and water, attracting wildlife and pollinators, and are healthier for human use
- Appropriate pruning to minimize waste, reduce costs and maximize the plant's benefits
- Sustainable planting design and maintenance to maintain local character and identity
- Sustainable landscape practices that help to maintain local jobs and businesses
- Identifying locally sourced materials to minimize transportation costs and resource consumption

Description and Justification for this request

Description of request	Justification for request
Adding a new minor consisting of existing LARC and HORT courses.	For students interested in significant world issues in landscape design, climate change, management, and sustainability.

Reviewer Comments

Alice Griffin (agriffin) (10/15/21 8:05 am): Rollback: Please enter requirements into a course list. If you need assistance, please contact me.

Alice Griffin (agriffin) (10/18/21 10:27 am): Inserted the range of hours with electives to match the total hours field. With approval from submitter.

Gina Daugherty (gdaugher) (10/25/21 2:16 pm): Rollback: Rolling back per request of ARCH Dean's office.

Alice Griffin (agriffin) (10/28/21 11:54 am): Rollback: Rolling back as requested by submitter.

Lona Robertson (ljrobert) (11/03/21 10:27 am): Confirmed with HORT their agreement.

Alice Griffin (agriffin) (11/03/21 1:42 pm): Changed response to scheduled program review date to NA. Minor programs are not reviewed.
