Reason for Offering

Program Off Campus

During marketing surveys, current and potential students have indicated a desire for graduate certificates focusing on specific disciplines within operations management. This initiative led to MSOM certificates in Project Management, Lean Six Sigma and Homeland Security Operations which has resulted in more than 198 certificates awarded since 2018. A new need emerged from student interest; students with an undergraduate STEM degree or an MS in another discipline (e.g., M.S. in Engineering or M.S. in Operations Management) seeking a broad understanding of engineering analytics to upgrade skills or prepare for engineering management positions. May be used as an entry to the Master of Science in Engineering Management, but cannot be awarded concurrently with the degree.

Reason for offering

Web-based Program

Market research and needs assessment indicate working professionals prefer the flexibility of online instruction. Additionally, needs expressed by students in the MSOM, MSEM and MSE programs prefer the flexibility of 5 8-week terms. The attached survey shows decision-makers in Arkansas companies believe an option for mixed methods including web-based/online instruction is an important part of any program.
