14.0901 - Computer Engineering, General.

#### Program Title

Computer Engineering, Bachelor of Science in Computer Engineering

#### Program Delivery

##### Method

On Campus

Is this program interdisciplinary?

Yes

#### College(s)/School(s)

**College/School Name**

Fulbright College of Arts and Sciences (ARSC)

Does this proposal impact any courses from another College/School?

**No**

What are the total  
hours needed to  
complete the  
program?

**126**

## Program Requirements and Description

### Requirements

The computer engineering degree has required sequences of courses in both hardware and software aspects of computer applications and design. Since almost all of today's complex systems encompass hardware and software elements, computer engineering graduates must acquire the skills required to design, build, and test complex digital systems. At the advanced level, students are exposed to hands-on experience with open-ended problems with opportunities for research and design.

Humanities and social science electives are selected from the University Core Requirements listed in the Catalog of Studies. To satisfy the University Core, all CSCE students are required to take the following 18 hours of humanities/social science courses:

<a href="#">PHIL 3103</a>	Ethics and the Professions	3
Fine Arts from Category "A"		3
U.S. History or Government		3
Social Science		9

The Undergraduate Handbook has a list of approved basic science, mathematics, and technical electives. Any course not included in these lists requires faculty approval.

The Bachelor of Arts in Computer Science degree has the same educational objectives as the Bachelor of Science degree. However, the course requirements differ greatly to allow students to double major or pursue other interests.

### 8-Semester Plan

## Computer Engineering B.S.Cmp.E. Eight-Semester Degree Program

The following sections contain the list of courses required for the Bachelor of Science in Computer Engineering (B.S.Cmp.E.) with a suggested sequence below.

Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites. Students wishing to follow the eight-semester degree plan should see the [Eight-Semester Degree Policy](#) in the Academic Regulations chapter for university requirements of the program.

First Year	Units
	FallSpring
<a href="#">GNEG 1111</a> Introduction to Engineering I	1
<a href="#">MATH 2554</a> Calculus I (ACTS Equivalency = MATH 2405)	4
<a href="#">PHYS 2054</a> University Physics I (ACTS Equivalency = PHYS 2034)	4
<a href="#">CHEM 1103</a> University Chemistry I (ACTS Equivalency = CHEM 1414 Lecture)	3

<u>ENGL 1013</u> Composition I (ACTS Equivalency = ENGL 1013)	3
<u>GNEG 1121</u> Introduction to Engineering II	1
<u>MATH 2564</u> Calculus II (ACTS Equivalency = MATH 2505)	4
History/Government Elective	3
<u>PHYS 2074</u> University Physics II (ACTS Equivalency = PHYS 2044 Lecture)	4

Program Goals and Objectives

**Program Goals and Objectives**

**Program Goals and Objectives****Program Educational Objectives**

For the B.S. degree program in computer engineering, the following set of program educational objectives describe what graduates are expected to attain within a few years after graduation.

Computer Engineering graduates will:

1. Be able to practice their profession in a competitive market. The competitive market includes being recruited by industrial firms, government agencies and graduate schools.
2. Make a significant contribution to society, including improving the standard of living particularly for the taxpayers of the state of Arkansas.
3. Understand the need for life-long learning and continued professional development for a successful and rewarding career.
4. Accept responsibility for leadership roles, in their profession, communities, and society.

NA

## Learning Outcomes

**Learning Outcomes**

### Learning Outcomes

#### Student Learning Outcomes

**CE1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.**

**CE2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.**

**CE3. An ability to communicate effectively with a range of audiences.**

**CE4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.**

**CE5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.**

**CE6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.**

**CE7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies. ~~NA~~**

#### Description and justification of the request

Description of specific change	Justification for this change
<p>Replace INEG 2313 with INEG 3313.</p> <p>Updated computer engineering Student Learning Outcomes</p>	<p>INEG developed a new course, INEG 3313, for non-majors and the CE program has voted to replace INEG 2313 with INEG 3313. However, the INEG 3313 is in the approval chain and I cannot add it yet.</p> <p>CSCE voted to use new EAC of ABET outcomes for computer engineering</p>

#### Reviewer Comments

**Alice Griffin (agriffin) (09/20/19 3:18 pm):** Swapped Social Science elective course and CSCE elective course with a comment for each. It removed the red box error. College is encouraged

to review these changes to make sure the edits resulted in the intended outcome.

**Alice Griffin (agriffin) (09/20/19 3:20 pm):** Inserted Scheduled Program Review date.
