Program Requirements and Description

Requirements

Data and Cybersecurity Management Minor

The Data and Cybersecurity Management minor in the Information Systems Department of the Walton College of Business is designed to develop graduates able to help organizations assess and detect threats while securing and protecting data and data-driven systems against a myriad of threats such as malicious software, hacking, insider threats, and other cybercrimes. Students will also learn and apply best industry practices to minimize data collection, protect client and individual privacy, and otherwise further ethical data management. Students will not only learn about cybersecurity, crime, and privacy law, but will also learn about techniques of risk

assessment, continuity planning, and threat detection. This will include learning with respect to behavioral aspects, ethics, legal considerations, and best practices in cyber security management. The minor requires completion of 15 hours of study with all of the upper level courses applied toward the minor in residence. The 15 hours include the following courses:

Required Core Courses:

ISYS 4013 PRINCIPLES OF DATA AND CYBERSECURITY

Course ISYS 4013 PRINCIPLES OF DATA AND CYBERSECURITY Not Found

ISYS 4023 NETWORK AND DATA SECURITY IN A CHANGING WORLD

Course ISYS 4023 NETWORK AND DATA SECURITY IN A CHANGING WORLD Not Found

ISYS 4043 CYBERSECURITY, CRIME AND PRIVACY LAW

Course ISYS 4043 CYBERSECURITY, CRIME AND PRIVACY LAW Not Found

Choose six hours from the following:

ISYS 3273 CRYPTOCURRENCY

Course ISYS 3273 CRYPTOCURRENCY Not Found

ISYS 4033 ADVANCED INFORMATION SECURITY MANAGEMENT

Course ISYS 4033 ADVANCED INFORMATION SECURITY MANAGEMENT Not Found

ISYS 4053 ADVANCED CYBERSECURITY, CRIME AND PRIVACY LAW

Course ISYS 4053 ADVANCED CYBERSECURITY, CRIME AND PRIVACY LAW Not Found

Program Goals and

Objectives

Program Goals and Objectives

The minor is designed to develop graduates able to help organizations assess and detect threats while securing and protecting data and data-driven systems against a myriad of threats such as malicious software, hacking, insider threats, and other cybercrimes; to learn and apply best industry practices to minimize data collection, protect client and individual privacy, and otherwise further ethical data management. Students will not only learn about cybersecurity, crime, and privacy law; and learn about techniques of risk assessment, continuity planning, and threat detection.

Learning Outcomes

Learning Outcomes

Upon completion of the program, students will:

- Have mastered the technical strategies, tools and techniques commonly used to secure data and information in the enterprise.
- Understand and be able to apply cybersecurity, crime, tort, and privacy law to the management of data and systems.
- Understand disclosure, notification, breach, and other privacy and transparency obligations under state, federal, and international law.
- Be able to detect and identify common malicious software and attack protocols.
- Be able to apply critical thinking to creatively and systematically solve problems and meet challenges of the ever-evolving environments of cyber security.
- Understand the state of cybersecurity nationally and globally.
- Be able to apply data and cybersecurity management techniques to their fields of study.

Description and Justification for this request

Description of request

Justification for request

Description of request	Justification for request
To add a minor in Data and Cybersecurity Management for business majors.	To provide a minor for students interested in helping organizations assess and detect threats while securing and protecting data and data-driven systems.
