Program Requirements and Description

Requirements

Requirements for B.S. in Biological Engineering with Environmental Concentration

The undergraduate program in biological engineering, leading to a Bachelor of Science degree in Biological Engineering, is accredited by the Engineering Accreditation Commission of ABET, www.abet.org of ABET. The B.S. in Biological Engineering degree is conferred by the College of Engineering and is granted after the successful completion of 128 hours of approved course work.

Diverse applications of biological engineering can be pursued through elective coursework. Each student is required to complete 12 semester hours of biological/engineering/technical electives that are relevant to their career goals. Students may choose to pursue the Environmental Concentration within the B.S. in Biological Engineering by carefully choosing their electives to fit the special requirements for the concentration. At least 3 hours must be selected from a list of acceptable biological electives for the environmental concentration. Two 3-hour elective slots are fulfilled by choosing CVEG 3243 and CVEG 4243, see below. The remaining 3 hours of technical electives can be selected from a set of engineering, biology, agriculture, sustainability, and other

science/technical areas. A list of acceptable **technical** electives, for the environmental concentration, is maintained by the department.

Students are required to complete 40 hours of upper division courses (3000-4000 level). It is recommended that students consult with their academic adviser when making course selections.

Requirements for Environmental Concentration

Complete 12 hours from the following courses:

CVEG 3243	Environmental Engineering	3
CVEG 4243	Environmental Engineering Design	3
Biological Electives 1		3
Technical Electives 1		3

1A list of biological and technical electives for the Environmental Concentration is maintained by the department.

8-Semester Plan

Biological Engineering B.S. with Environmental Concentration

Eight-Semester Degree Program

The Bachelor of Science in Biological Engineering with Environmental Concentration program is eligible for students who want to participate in an Eight Semester Degree Program. See the [Eight-Semester Degree Policy](#) for more details. The plan below lists a semester-by-semester sequence of courses to finish the degree in eight semesters. University core courses for engineering are listed at the bottom of this page. Students may submit a maximum of 4 hours of "D" in BENG courses for their degree. Some courses are not offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course pre-requisites.
