Program Requirements and Description

Requirements

Requirements for B.S. in Chemical Engineering

Each student in chemical engineering is required to complete 128 hours of coursework including the 35-hour University Core. To be eligible for graduation, all students must complete at least 30 hours of Chemical Engineering (CHEG) classes at the University of Arkansas, Fayetteville that are required for the degree. Each student in chemical engineering is also required to complete six semester hours of technical electives, three semester hours of Advanced Science electives, three semester hours of Chemical Engineering electives, and three semester hours of Advanced Science or Chemical Engineering electives. As discussed in the department's Undergraduate Advising Manual, students can select elective courses to better prepare for employment or further study in areas such as:

Biotechnology

Biomedical engineering

Environmental engineering

Food process engineering

Materials engineering

Microelectronics

Nanotechnology

Nuclear engineering

Pre-medicine

Simulation and optimization

Additional opportunities are available to enhance the educational experience of students in these areas.

Students should consult their academic adviser for recommendations.

8-Semester Plan

Chemical Engineering B.S.Ch.E.

Eight-Semester Degree Program

The following section contains the list of courses required for the Bachelor of Science in Chemical Engineering degree. Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites. Students wishing to follow the eight-semester degree plan should see the [Eight-Semester Degree Policy](#) in the Academic Regulations chapter for university requirements of the program. Entering freshmen will be required to participate in selected Freshman Engineering Student Services.

 Program Goals and Objectives

Program Goals and Objectives

The educational objectives of the Chemical Engineering undergraduate program are to prepare students for career and professional accomplishments after graduation including:

1. **Successfully practicing** ~~1.Successfully practice~~ as an engineer or in **another** ~~some other~~ professional pursuit, including traditional or emerging fields of chemical **engineering, making a positive impact locally and globally.** ~~engineering.~~
2. **Actively involved** ~~2.Enter and successfully participate~~ in **a graduate or** professional **lifelong learning, both informal and formal,** ~~program~~ that **deepens** ~~continues~~ their **knowledge and readiness to contribute to advancing science, technologies and solutions essential for the future, including successfully participating in a graduate or professional program.** ~~career development.~~

Learning Outcomes

Learning Outcomes

By the time of graduation, our students attain the following student outcomes:

- **An** ~~an~~ ability to **identify, formulate, apply knowledge of mathematics, science,** and **solve complex engineering problems by applying principles of engineering, science, and mathematics.**
- **An** ~~an~~ ability to **apply the engineering design process and conduct experiments, as well as** to **produce solutions that meet specified needs with consideration for public health and safety,** ~~analyze~~ and **global, cultural, social, and environmental, economic, and other factors as appropriate to the discipline.** ~~interpret data~~
- **An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgement to draw conclusions.** ~~an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability~~
- **An ability to communicate effectively with a range or audiences.** ~~an ability to function on multidisciplinary teams~~
- **An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.** ~~an ability to identify, formulate, and solve engineering problems~~

Learning Outcomes

- **An ability to recognize the ongoing need to acquire new knowledge, to choose appropriate learning strategies, and to apply this knowledge.** ~~■ an understanding of professional and ethical responsibility~~
- **An ability to function effectively as a member or leader of a team that establishes goals, plans tasks, meets deadlines, and creates a collaborative and inclusive environment.** ~~■ an ability to communicate effectively~~
- ~~■ the broad education necessary to understand the impact of engineering solutions in global, economic, environmental, and societal contexts~~
- ~~■ a recognition of the need for, and an ability to engage in life-long learning~~
- ~~■ a knowledge of contemporary issues~~
- ~~■ an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.~~

Description and justification of the request

Description of specific change	Justification for this change
Change was made to put in place the new ABET outcomes for engineering	All Engineering programs now receive accreditation under this revised set of engineering outcomes
<p>Revised formatting of the eight semester degree plan. Inserted the General Education language.</p> <p>Also added footnotes and hyper-linked courses for access to course details. AG</p>	<p>To provide consistency with the General Education curriculum language.</p> <p>Footnotes provides list of courses that specifically meets each General Education Outcome on behalf of the college.</p> <p>Changes to ENGL 1033 requirement will need program change to receive campus approval. AG</p>
Moved PHYS 2054 in curriculum (and changes related to this move).	Due to new prerequisites for this course.

Reviewer Comments

Alice Griffin (agriffin) (03/05/20 5:08 pm): Rollback: Rolling back so program can submit General Education changes.

Lisa Kulczak (lkulcza) (08/14/20 12:06 pm): Rollback: Per request from Alice G.

Alice Griffin (agriffin) (08/21/20 4:17 pm): Added additional courses approved for the General Education curriculum.

Manuel Rossetti (rossetti) (01/12/21 4:34 pm): Rollback: Rollback to allow change with FEP science elective and Physics 1 to be addressed.

Dave Ford (daveford) (01/20/21 3:46 pm): Rollback: Rolling back for Phys 1 change

Lisa Kulczak (lkulcza) (01/21/21 9:41 am): Rollback: Rolling back to submitter for additional updates, per request of dean's office.

Alice Griffin (agriffin) (01/22/21 1:18 pm): Rollback: Please review the eight semester plan. Placing the Humanities elective in the fall semester of the third year, places students in an overload (beyond 18 hours). Recommending the requirement be moved to either third year, spring; or fourth year, fall or spring. Any semester could be used, as long as it remains 18 hours or under.

Alice Griffin (agriffin) (02/04/21 12:09 pm): Reinserted HIST 2013 and PLSC 2003 as course options with HIST 2003 to satisfy the History or Government State Minimum Core requirement in first year of eight semester plan. College is encouraged to review.

Alice Griffin (agriffin) (02/04/21 12:12 pm): Moved gen ed comment regarding 4.2 to first year fall semester to accompanying the movement of the History and Government requirement. College is encouraged to review for accuracy and intended placement.

Alice Griffin (agriffin) (02/04/21 12:19 pm): Reinserted General Education language to PHYS 2054 and PHYS 2074 to clarify that the program satisfies outcome 3.4.

Alice Griffin (agriffin) (02/04/21 12:20 pm): ATTENTION: Since request impacts courses from another college, this minor program change will require campus approval.
