Description and Justification for this request

Description of request	Justification for request
<p>A new, 30 hour Masters of Professional Accounting with concentrations in Analytics and Assurance, Taxation, and Corporate Accounting utilizing existing courses within the Master of Accountancy and other Walton programs. One new tax course, ACCT 5853, State and Local Taxation, is being developed. This is the Corporate Accounting proposal.</p>	<p>The ACCTMP is responsive to the shifting skillset and additional demands within the Accounting Profession. More Universities are adapting specialized content into their graduate accounting degrees. Whereas past accounting Master degrees tended to be general in nature, more specialized degree paths and skills are being sought by career entrants. Emerging technology is changing the core ways that the accounting profession is providing services. As a result, new skills that involve data & analytics are needed. Complementing these technical skills, the workplace has increased its emphasis on the development of soft skills, such as leadership and professionalism. The complexity of business environments that accounting professionals face has also increased the demand for richer content, including complex tax issues, technology environments, regulatory reporting requirements among others. The importance of Internships has also increased. We are also seeing a greater number of our students take initial accounting employment outside of traditional public accounting roles.</p>
