Program Requirements and Description

Requirements

Requirements for the Master of Science in Civil Engineering Degree: Minimum 30 semester hours of graduate-level credit for thesis option; or **30 ~~36~~** semester hours of graduate-level **non thesis or research** credit for course work only option. Candidates for the degree who present a thesis are required to complete a minimum of 24 semester hours of course work and a minimum of six semester hours of thesis.

Candidates for the degree who do not present a thesis are required to complete a minimum of ~~30~~ **36**-semester hours of graduate-level course work.

Candidates for the degree must present a cumulative grade point average of 3.00 on all graduate courses. The minimum acceptable grade for any course is "C."

Upon admission to the Graduate School and acceptance in a program of study, candidates pursuing a thesis-based program will be assigned to a major adviser, who in consultation with the department head, will select a graduate committee. With guidance from the committee, the candidate will develop a plan of study and a research project to be completed by the candidate. The committee will serve as the examination committee for the final oral and/or written examination and for the thesis. Candidates pursuing a coursework-based program will be assigned to a major adviser, who will assist the candidate in developing a plan of study; the major adviser will coordinate the final and/or written examination.

All graduate students enrolled in the M.S.C.E. program in the Department of Civil Engineering must successfully complete one semester of [CVEG 5100](#) Graduate Seminar in Civil Engineering.

Students should also be aware of Graduate School requirements with regard to [master's degrees](#).

Program Goals and Objectives	
Program Goals:	
1. Prepare students to pursue careers in the broad field of civil engineering.	
2. Prepare students to demonstrate advanced technical knowledge related to civil engineering.	
Learning Outcomes	
Learning Outcomes	
Student Learning Outcomes:	
1. Apply knowledge of mathematics, science, and engineering to solve advanced-level engineering problems in civil engineering.	
2. Locate and evaluate pertinent published literature relevant to a given topic, and apply the information gained to a design, analysis, or research effort.	
3. Organize and deliver effective communications.	
4. Design a system, component, or process to meet desired needs.	
5. Design and conduct experiments, and analyze and evaluate the resulting data.	

Description and justification of the request

Description of specific change	Justification for this change
Reduce the number of hours for the course work only option from 36 to 30	To be consistent with other MS Programs in the college.
